

## **FRONT/REAR LOAD COMPACTOR** MODEL KP6R/KP6F

# Attractively Blends Into Its Surroundings

K-PAC's neat, clean appearance, in both the rear loading model and the front loading model, blends attractively with its surroundings. With the K-PAC's low 40" loading height, even the most petite person can handle the job. Close the lid, insert the key in the Power Pack Console and turn the K-PAC's powerful hydraulic system on. The packing panel automatically cycles.

Incorporated in the K-PAC design are unique safety features that prevent the compaction cycle from operating while the loading chamber lid is open. Another important safety back-up feature is a mushroom STOP button on the Power Pack console that will halt operation at any point in the cycle. The K-PAC's key-operated system also allows the charge lid to be locked for controlled access.

#### **K-PAC Advantage:**

- Latching System lid hold down latches • for quick driver release when dumping.
- Compact Weather Proof 3 Phase and/or . Single Phase Power Unit (UL Approved).
- Loading Chamber Lid is spring assisted . for ease of opening.

#### **KP6R/KP6F Specifications**

Manufacturer's Rating	1.00 y <sup>3</sup>
Ram Face	53"W x 46"H
Clear Top Opening	27.5" x 53.5"
Loading Height	40"
Ram Penetration	13"
Packing Force Normal	21,900 lbs
Packing Force Max.	24,700 lbs
Packing Pressure Normal	1,550 PSI
Packing Pressure Max.	1,750 PSI
Container Capacity	6 y <sup>3</sup>
Overall Dimensions	140" L x 78"W x 61"H

#### **Standard Power Pack**

Power Pack Cover	Protective Metal Cover with Hydraulic Hose Storage Slot
Power Pack	3 HP 1750 RPM TEFC
Control Panel	208/230/460 Volts 3 Phase 60 Hertz, Key Start Switch & Stop Buttons
Hydraulic Pump	5 GPM Hi-Lo with 200 Mesh Screen Suction Filter
Reservoir	13 Gallons
Fluid	Northland Talamar Extreme LT 1532
Hydraulic Hoses	12" with Quick Hydraulic Couplers Industrial Hydraulic Couplers
Cylinders	2 - 3" x 16"

#### **Cycle Time**

Time

26 Seconds
